

Aluminium brackets

Brackets extend the illuminated area. Alongside public roads, poles often are situated at some distance from the roadway and it is therefore necessary to place the luminaire at a distance from the pole, i.e. over the roadway. For this, the range of Hydro brackets includes single and double brackets, fixed on the pole or detachable.

Demountable brackets have the advantage that they achieve the optimum solution in terms of strength. In addition, they offer advantages in the field of logistics and installation of the pole. Use can be made of aluminum cast and connection pieces in both single and double versions.

Besides standard brackets, Hydro also produce custom made brackets in all shapes and dimensions.

Local technical support available in the UK.

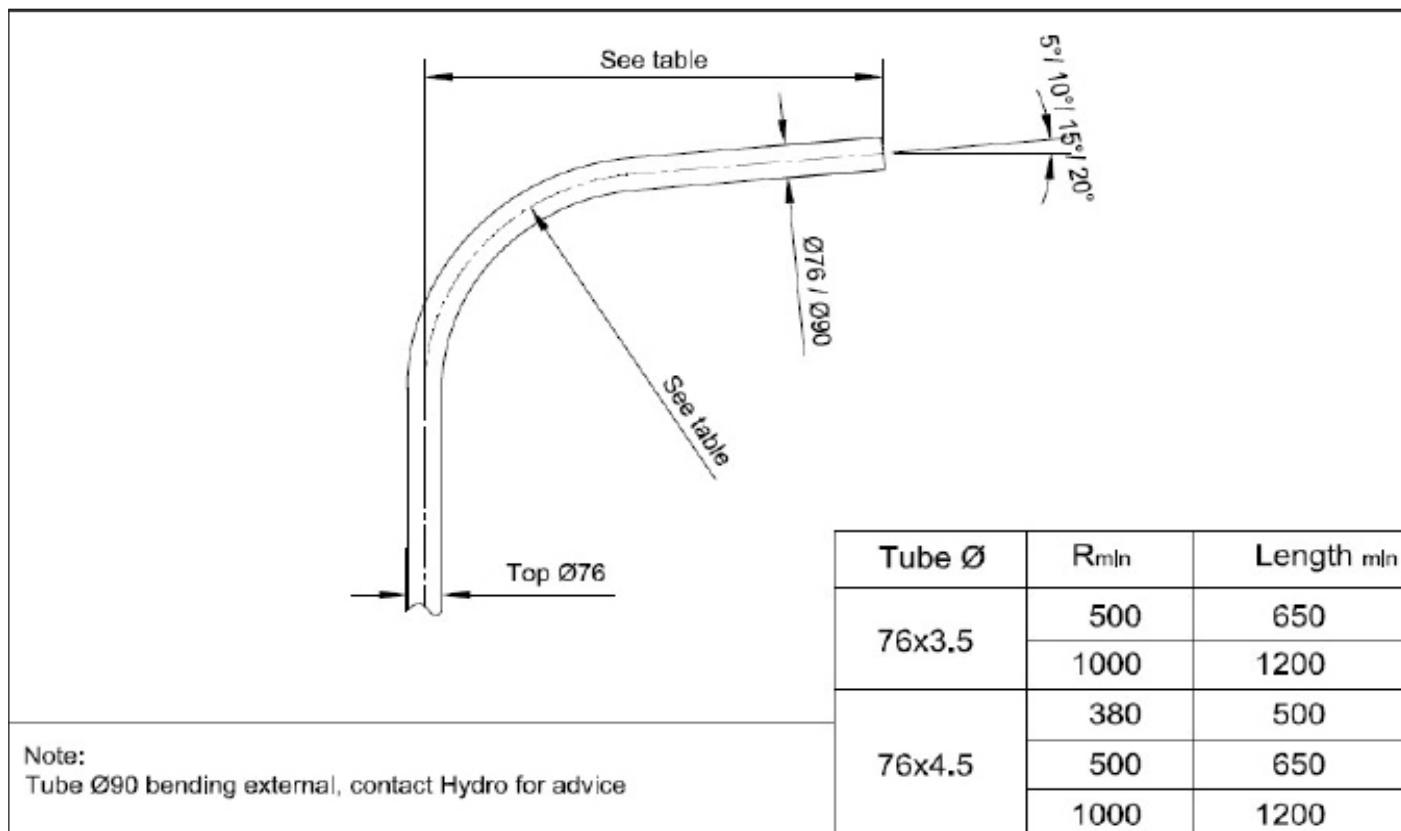

In compliance with standards and regulations:

- Design in accordance with the British standard BS EN 40-6
- Calculations according to the British standard BS EN 40-3-3
- Passively safe according to BS EN 12767 - see certificate EN 40
- *Cradle to Cradle Certified™* silver

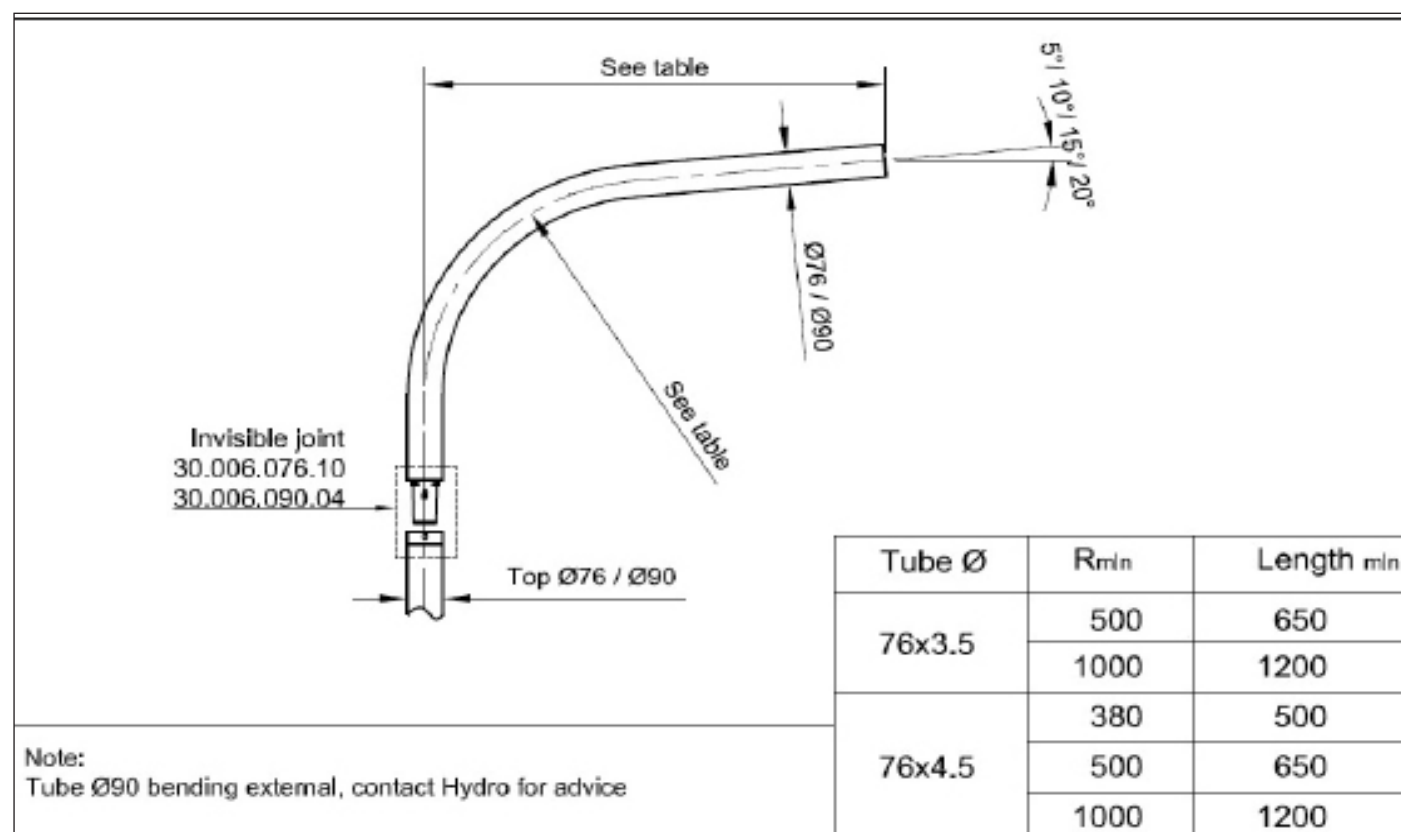

Assembly:

- Fixed
- Cast piece
- Invisible joint

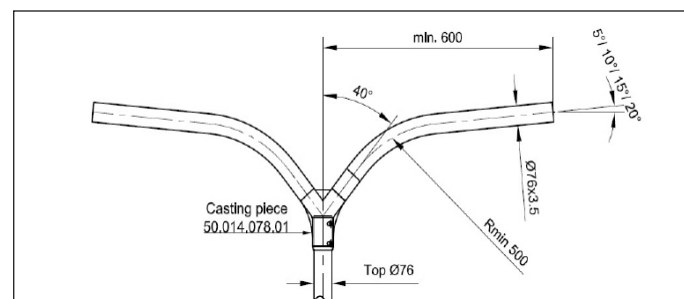

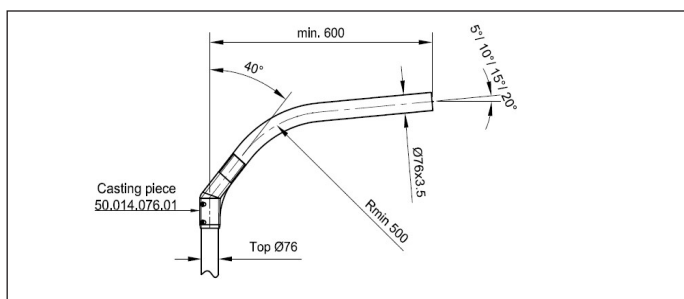

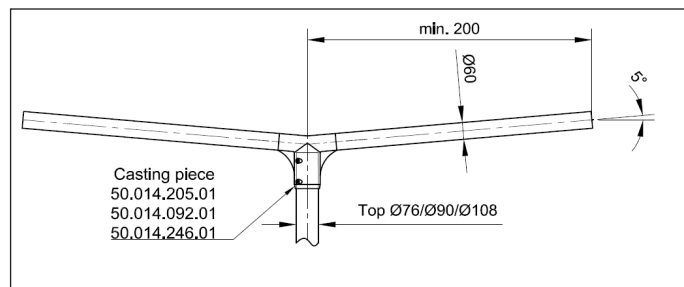

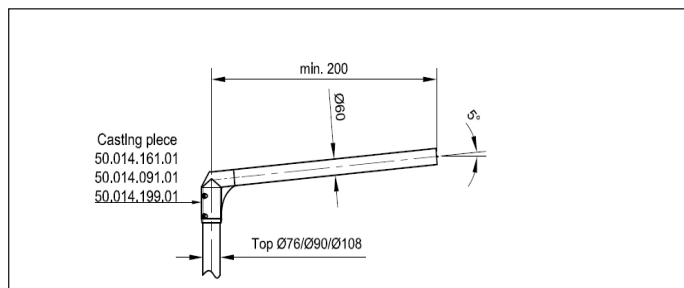

Fixed brackets

Brackets with invisible joint

Brackets with cast piece

Technical characteristics:

- Seamless tube made of aluminium extrusion;
- Alloy EN AW6060 T66;
- 100% recyclable;
- Surface standard satin brushed finish. Option anodized or electrostatically powder coated versions (in an optional RAL color). The bracket will then be supplied in a detachable version.
