

The chart displays the number of full-time equivalent jobs in the U.S. economy from 1967 to 2018. The y-axis represents the number of jobs in millions, ranging from 80 to 140. The x-axis represents the year. The data shows a consistent downward trend over the 51-year period. The 'Full-Time Equivalent Jobs' (blue line with circles) and 'Full-Time Equivalent Demand' (blue line with squares) series are nearly identical, indicating that the demand for jobs closely matches the actual number of jobs available. The number of jobs starts at approximately 125 million in 1967 and declines to about 100 million by 2018.

Year	Full-Time Equivalent Jobs (Millions)	Full-Time Equivalent Demand (Millions)
1967	125.0	125.0
1968	124.5	124.5
1969	124.0	124.0
1970	123.5	123.5
1971	123.0	123.0
1972	122.5	122.5
1973	122.0	122.0
